AANCHAL NASRULLAH

Creative Designer
and Developer

ABOUT ME

Hello! I'm Aanchal, a multidisciplinary designer and front-end developer in the process of completing my degree in Creative Computing. My expertise lies in crafting visually appealing digital products such as interactive web applications and creative computing projects.

My design process is based on a combination of design thinking and technical expertise. In my opinion, the most effective digital products are those that appear simple and seamless to use, concealing complexity behind a visually appealing and intuitive design.
